Do-Be-Feel list

The do-be-feel model is a way of understanding a user's behaviour, goals, and motivations in relation to the project.

It consists of the following:

* **Who** will be using the tool
* What the tool should **do**
* What the user wants it to **be**
* How users should **feel** when using it

Who(Roles)	Do(Functional goal)	Be(Quality Goal)	Feel(Emotion Goal)
Administrator	Access Synaesthesia diagnosis application	Responsive	Informed
Academic researcher	Login into account	Secure	Safe
Study participant	Learn about Synaesthesia	Informative	Curious
Possible synaesthete	View test results	Accurate	Fulfilled
	Participate in the test	Engaging	Focused
	Notify about new test submissions	Scalable	Informed
